

## **Contribution of Greater Dallas Section of ITE to the LeadershipITE Program**

The Greater Dallas Section of ITE is an organization dedicated to transportation engineering in the Greater Dallas Area. The Dallas Section is part of the Texas District of ITE, known as TexITE. TexITE is contributing up to \$6,000 in total scholarships for those TexITE members that are selected for the annual program. The current cost of participating in LeadershipITE is approximately \$3,000 per individual, not including travel or lodging/meal costs.

To underscore the importance of this program, the Dallas Section of ITE is committing up to \$1,000 annually in additional funding to be used to help defray the out of pocket costs for a Dallas Section member that has been selected for the LeadershipITE program. If multiple members from the Dallas section are selected in the same year, the \$1,000 shall be split equally among those members.

It is the duty of a member that has been selected to notify the current Dallas Section Officers with documented proof of selection prior to the release of funds. The funds shall be provided in lump sum check format only, drawn from the General Account Balance. The check(s) from the Dallas Section shall be provided approximately 60 days after the program begins for that member in any particular year.

If no member of the Dallas Section has been selected for LeadershipITE in a particular year, no expenditure of funds shall be made for that year.

All members requesting such funds shall be a full member of both the Dallas Section of ITE, and a full dues paying member of the International ITE organization.
